**NOTE 1:** Contact AWID for proper mounting of an AWID Windshield Tag (WS) for a 2007 Mercedes-Benz S-Class equipped with "Night View Assist".

**NOTE 2:** On noted Mercedes cars one cannot visually see the infrared reflecting glass option. If the brand name "Sunguard" is noted on windshield's lower right hand side (looking into car) then the infrared reflecting glass option is installed. Infrared glass option typically comes with double pane noise reducing side window option.

**NOTE 3:** On "7" Series BMW cars one can visually see the infrared reflecting glass option as a yellowish coating on the windshield as viewed from a slight angle. In addition to the open area around top center location around the rear view mirror, there is also a trapezoidal shaped cutout at dashboard level just to the right of windshield middle looking into the car.

**NOTE 4:** AWID cannot be held responsible regardless of vehicle type for UHF based aftermarket windshield options that could interfere with AWID's model LR-2000 AVI reader.

**AWID WINDSHIELD TAGS FOR SPECIFIC CARS (page 2)**

The following car models have windshields that prevent the use of an AWID Windshield Tag (WS) and possibly a Rear View Mirror Tag (RV) and/or a Visor Tag (VT). If you own one of these cars, contact AWID for a front exterior license plate tag.
