

total access control

# SLIDE GATE ACCESSORIES

# V-WHEEL

## ASSEMBLIES

Upswung.com

## features

- Full line of wheel and wheel assemblies to meet your specific application and budgetary requirements
- UHMW and steel wheels and wheel assemblies available
- Steel roller bearings or sleeve bearing available
- Tandem wheel assemblies provide superior performance for heavy gates by distributing the gate weight across 4 wheels instead of 2

**total access control**

**TECH SPECS**

**V-Wheels**

4" UHMW V-Wheel 1201-004  
Sleeve bearing  
Maximum gate weight 500 lb

4" UHMW V-Wheel 1201-006  
Sealed roller bearing  
Maximum gate weight 750 lb

4" machined steel V-Wheel 1201-016  
Sealed roller bearing  
Maximum gate weight 1500 lb

6" machined steel V-Wheel 1201-000  
Sealed roller bearing  
Maximum gate weight 2500 lb

**V-Wheel Assemblies**

4" UHMW V-Wheel 1201-102  
Sleeve bearing  
Maximum gate weight 500 lb  
Mounting bracket for 2x2 bottom rail

4" UHMW V-Wheel 1201-105  
Sealed roller bearing  
Maximum gate weight 750 lb  
Mounting bracket for 2x2 bottom rail

4" machined steel V-Wheel 1201-117  
Sealed roller bearing  
Maximum gate weight 1500 lb  
Mounting bracket for 2x2 bottom rail

**Tandem V-Wheel Assemblies**

4" UHMW V-Wheel 1201-012  
Sealed roller bearings  
Pivoting bracket  
Maximum gate weight 1500 lb

4" machined steel V-Wheel 1201-010  
Sealed roller bearing  
Pivoting bracket  
Maximum gate weight 3000 lb

6" machined steel V-Wheel 1201-210  
Sealed roller bearing  
Pivoting bracket  
Maximum gate weight 5000 lb

**V-WHEELS** are used in slide gate applications that utilize an inverted "V" type track. These V-Wheels are ideal for replacement purposes, or in applications where custom wheel mounting is utilized. V-Wheel assemblies are guarded and include mounting brackets designed for 2-inch wide gate rails.

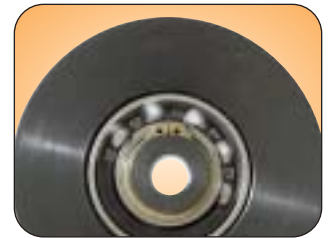

Tandem V-Wheel assemblies are ideal for heavy gates. The pivoting bracket and tandem arrangement of the wheels allows the total weight of the gate to be evenly distributed across a larger portion of the V-track.

**pivot point**  
for heavy duty gates

**UHMW wheels**  
for smooth quiet operation

**sealed bearings**  
maximum load bearing with excellent durability

**V-Wheels**

Available in sleeve and sealed roller bearings  
4" Machined Steel and UHMW V-Wheels  
6" Machined Steel V-Wheels  
Maximum gate weights of 500, 750, 1500, and 2500 lbs

1201-004

1201-006

1201-016

1200-000

**V-Wheel Assemblies**

Available in sleeve and sealed roller bearings  
4" Machined Steel and UHMW wheels  
Maximum gate weights of 500, 750, and 1500 lbs  
Mounting bracket for 2 x 2 bottom rail

1201-102

1201-105

1201-117

**Tandem V-Wheel Assemblies**

4" Machined Steel and UHMW wheels  
6" Machined Steel wheels  
Maximum gate weights of 1500, 3000, and 5000 lbs  
Pivoting mounting bracket

1201-010

1201-012

1201-210
