Mounting Posts

The Architectural and Standard style mounting posts are available in either pad mount or in-ground mounting configuration. Pad mount posts include a base plate and base plate cover. In-ground mount posts have approximately 22-inches of length added to the mounting posts for in-ground mounting. The dual mount post is available in pad mount configuration only.

TECH SPECS

STANDARD

1200-045

Standard Short Gooseneck

42 inches tall with base plate for pad mounting. Uses 2x2 square stock and sweeps out 12 inches. Use to mount card readers.

1200-046

Standard Long Gooseneck

64 inches long, no mounting plate. Uses 2x2 square stock and sweeps out 12 inches. Use to mount card readers

HEAVY-DUTY

1200-037

Architectural Style Heavy Duty Short Gooseneck

42 inches tall to bottom mounting plate. Includes base plate for pad mounting. Uses 4x4 stock and angles out 14 inches. Use with surface mount phone units.

1200-038

Architectural Style Heavy Duty Long Gooseneck

64 inches long, no mounting plate. Uses 4x4 stock and angles out 12 inches. Use with surface mount phone units.

DUAL

1200-049

Dual Gooseneck

Two 12 inch sweeps, one at 42 inches and one at 72 inches. Ideally used in applications where both auto and truck traffic are required to use the entry system. Uses 2x2 and 2x4 stock and has a mounting plate for pad mounting.

pad mount

subtle for securing to concrete or asphalt

in ground mount with cement

recess pole 22 inches and add cement for additional support
