

SINGLE TENANT TELEPHONE ACCESS CONTROL RETROFIT SYSTEM

TAC2C

SIMPLIFY YOUR LIFE WITH THE LIFTMASTER® MODEL TAC2C

The LiftMaster® Model TAC2C System provides new life to your damaged, malfunctioning, or old Crown Jewel telephone entry unit. Homeowners can use any touch-tone phone in the home to speak to a visitor, and then grant or deny access through their gate or door.

Attractive and Durable

Hardwired for power and connected directly to your existing telephone line, the TAC2C greets visitors with a high-visibility backlit keypad, and attractive styling. And its rugged, tamper-resistant stainless steel faceplate and security screws are engineered to resist the elements and intruders alike.

The Power is in your hands

The TAC2C is simple to use and allows the homeowner or small business to greet visitors, grant or deny access, or activate several system modes; all from the convenience of their touch-tone phone.

Standard Features

- Remote Open: Open two entrances independently from your home or office
- Party Mode: To open, and hold your entrance open
- Vacation Mode: Locks the system down when no administrator is present
- Do Not Disturb: Silence the telephone call mode for additional privacy
- Intercom Mode: Useful to make wired phones active for access in "Cellular Only" homes
- Call Forward: Allows you to greet a visitor, even when you're not home

Gate Access Systems

TAC2C

SECURITY. SIMPLICITY. FLEXIBILITY. WE BRING IT ALL TOGETHER.

Advanced technology means far greater simplicity. LiftMaster® security access products are easy to use, work together seamlessly and are adaptable to a variety of applications – residential and commercial.

Standard Features

- Call Button – separate user-friendly push button initiates a phone call to the resident.
- Digital Voice Quality – advanced electronics provide automatic sound leveling and background noise filtering to provide clear communication.
- Distinctive Ringing – Provides a unique double ring on the system's main telephone line to distinguish between a standard phone call and a visitor request call.
- Call Waiting – Allows a person to answer a call from the door or gate while in the middle of another outside call.
- Call Forwarding – Allows you to greet a visitor, and grant access, even if you're not home. Forward the TAC2C calls to your cell phone, and still be able to talk to visitors and grant access.
- Entry Codes – Up to 200 4-digit codes can be set as permanent or one-time-use only.
- Flexible dual control feature – The TAC2C can be connected to two devices such as a door or gate, using the two independently controlled relays.

Enhanced Features

- Tamper Alarm – When sensors in the TAC2C detect a possible forced entry into the enclosure, the system will shut down for two minutes activating an audible alarm, and it will send a message to the phone in the home. Phones equipped with an LCD will see an alarm message.
- Auto Sensor Input – May be set to automatically dial the residence when a vehicle approaches the property.
- Intercom Mode – Allows use of the TAC2C with PBX systems.

Dimensions

Specifications

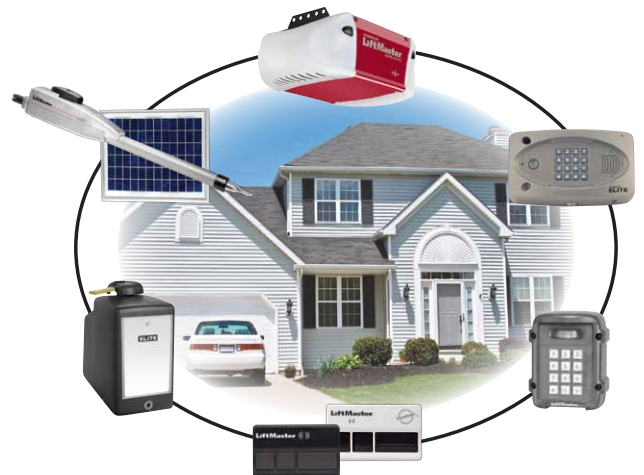

- UL/CEC Listed 16 Volt DC 2.5 Amp Transformer included
- Alternate (10 to 16 volts AC, 20 VA or 12 to 24 volts DC, 500mA)
